Cost of living supplements totalling $19,797,884 were paid to eligible recipients of a superannuation allowance. The annual increases are tied to the consumer price index and are payable to the extent that the capitalized value is available in the Inflation Adjustment Account created for the purpose. For this purpose employee and employer contributions each at the rate of 1.00% of salary and interest earnings attributable to funds held for the payment of superannuation allowances in excess of the rate assumed by the actuary are allocated to the Inflation Adjustment Account.

*Section 13 (6)* — Amounts totalling $1,498,173 were paid out of employer contributions to the Medical Services Plan of British Columbia in respect of the matching one half share of monthly medical coverage premiums of eligible recipients of a superannuation allowance.

*Section 21* — Actuarial and administrative expenses paid from the Fund amounted to $1,782,245. In addition, Investment Management Fees of $768,406 were paid by the Fund to the Provincial Treasury for investment services, in respect of investment management and the safekeeping of securities.

*Section 26* — Long-term securities held by the trustee as at December 31, 1986 amounted to $1,804,155,391 par value, as set out in the attached Schedule 1.

Investment transactions during the year (par value) are summarized on the attached Schedule 3.

During the year, the average rate of return of long-term investments purchased was 9.334%. The net earned rate of the Fund was 10.145%.

An Investment Advisory Committee, consisting of the Commissioner of Municipal Superannuation and the Director, Finance, Superannuation Commission, together with representatives from the Ministry of Finance, and the Union of B.C. Municipalities Joint Advisory Committee on Pensions, meets on a quarterly basis during the year and sets guidelines and policy under which investments may be purchased and sold.

The investment strategy followed for 1986 recommended a portfolio mix of 70% long-term and 30% short-term. Investment purchases and sales were managed to achieve this portfolio mix. Long-term investment purchases were in the five to ten year sector of the bond market.

The Superannuation Commission is responsible for cash management and advises the Provincial Treasury of funds available for investment.

*Section 30 (2)* — An actuarial valuation of the assets and liabilities of the Fund is required to be made by an actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1985. This valuation disclosed an unfunded liability of $855,352,000 in respect of basic pension benefits, given the present statutory levels of employee and employer contributions.

## AUDITOR'S REPORT

*To the Commissioner of Municipal Superannuation, and*
*To the Provincial Secretary and Minister of Government Services,*
*Province of British Columbia:*

I have examined the statement of financial position of the Municipal Superannuation Fund as at 31 December 1986 and the statement of changes in fund balance for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the Fund as at 31 December 1986 and the changes in the fund balance for the year then ended in accordance with the accounting principles described in note 2 to the financial statements applied on a basis consistent with that of the preceding year.

# MUNICIPAL SUPERANNUATION FUND

## NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 1986

### 1. DESCRIPTION OF THE MUNICIPAL SUPERANNUATION PLAN

The following brief description of the plan is provided for general information only. For more complete information about the plan, reference should be made to the *Pension (Municipal) Act*.

(a) General

The plan is a defined benefit pension plan, whereby benefits are not linked directly to contributions. The plan is open to eligible employees of a municipality, hospital, school district, regional college or other employer to which the *Pension (Municipal) Act* applies.

(b) Contributions

Members contribute to the Basic Account 5% of salary up to the year's maximum pensionable earnings and 6½% of salary in excess of the year's maximum pensionable earnings. Employers contribute to the Basic Account at varying rates depending upon the mix of employees in the group classifications specified by the plan. Members and employers also contribute 1% of salary to the Inflation Adjustment Account which was created in 1980 to provide for the payment of inflation adjustment supplements. Some employers have special agreements with their employees by which both make extra contributions to increase the employees' pensions. These contributions plus employees' voluntary contributions are credited to the Retirement Annuity Account.

(c) Retirement Benefits

Members are eligible for an unreduced pension if retirement is at normal retirement age, or at an age within 5 years of normal retirement age with at least 10 years contributory service. An unreduced pension is also available to members whose normal retirement age is 65, at age 55 with at least 35 years contributory service, or if the normal retirement age is 60, at age 50 with 30 years contributory service. A reduced pension is payable at an age 10 years under the normal retirement age with at least 10 years contributory service, or at 5 years under the retirement age with less than 10 years contributory service.

Hospital employees must have a minimum of 10 years contributory service to be eligible for a pension.

The plan provides a pension of 1¼% of the highest 5-year average salary for each year of pensionable service credited prior to the date the employer enrolled in the plan, plus 2% of the highest 5-year average salary for each year after the date the employer enrolled. The total maximum service allowable under the plan is 35 years. At age 65, date of death or disability, if earlier, there is a reduction in the formula as a result of integration with the Canada Pension Plan.

Increases in the inflation adjustment supplements are provided each January 1st and are related to the annual increase in the Consumer Price Index (CPI) as at the previous September 30th. The capitalized value of the increases shall not exceed the funds available in the Inflation Adjustment Account. At January 1, 1987 there were sufficient funds available to provide a full CPI increase of 4.1% (4.1% in 1986) to the basic lifetime portion of the contributory superannuation allowances in force.

(d) Termination and Portability Benefits

A terminating employee may choose between leaving accumulated contributions on deposit or obtaining a refund. The refund includes interest credited. Employees with at least 10 years of contributory service who leave contributions in the Fund are entitled to deferred pension benefits. Terminating employees not withdrawing contributions may carry certain pension rights to other pension plans that have portability arrangements with the Municipal Superannuation Plan. New contributors may also, under portability arrangements, transfer contributions and service from other plans to provide for or to increase pension benefits under the Municipal Superannuation Plan.

(e) Other Benefits

Disability and Survivor benefits are available under the plan.

## 2. SIGNIFICANT ACCOUNTING POLICIES

(a) General Information

These financial statements have been prepared on the accrual basis of accounting. They show only the position of the Fund as at December 31, 1986 and the changes in Fund balance for the year then ended and do not purport to show the adequacy of the Fund to meet the obligations of the superannuation plan. The results of the latest actuarial valuation of the plan are described in Note 6.

(b) Investments

Long-term investments are those purchased with a term in excess of one year. They are carried at cost of acquisition adjusted as follows:

(i) Discounts and premiums on single maturity bonds are amortized on a straight line basis over the remaining terms of the bonds.

(ii) Discounts on serial bonds are recognized as income when redemptions occur.

Short-term investments are carried at cost of acquisition.

(c) Deferred Losses Less Gains on Sale of Investments

Gains and losses on disposal of long-term investments are deferred and amortized on a straight line basis over the lesser of the remaining terms of the investments or twenty years. The amortization is charged against income from investments.

## 3. LONG-TERM INVESTMENTS

Long-term investments held at the end of the year are as follows:

| | 1986 | 1985 |
|---|---|---|
| | ($ Thousands) | |
| Book Value | 1,737,632 | 1,483,114 |
| Par Value | 1,804,155 | 1,557,761 |
| Market Value | 1,779,296 | 1,490,068 |

## 4. DEFERRED LOSSES LESS GAINS ON SALE OF INVESTMENTS

| | 1986 | 1985 |
|---|---|---|
| | ($ Thousands) | |
| Balance at beginning of year | 15,789 | 20,370 |
| Gains less losses on sale of investments | 4,391 | 2,614 |
| | 11,398 | 17,756 |
| Amortization for the year | 1,196 | 1,967 |
| Balance at end of year | 10,202 | 15,789 |

## 5. TRANSFERS

The Basic Account is increased by the capitalized value of inflation adjustment supplements and the capitalized value of the indexing of the highest average salary for employees electing deferred pensions during the year.

The Inflation Adjustment Account is increased by income that is earned on assets held in the Basic Account in respect of pensions being paid, and which is in excess of income calculated using the interest rate assumed by the Actuary.

## 6. ACTUARIAL VALUATION

According to the *Pension (Municipal) Act*, an actuarial valuation of the assets and liabilities of the Fund is required to be made by an Actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1985 and indicated an unfunded liability of $855,352,000 in respect of basic pension benefits. This represented an increase of $154,898,000 since December 31, 1982, the date of the previous valuation, and arose mainly from interest charges on the unfunded liability.

The Actuary stated that he did not see the unfunded liability as a threat to the continued payment of pensions to current and prospective pensioners. He does, however, recommend that the statutory contribution rates be increased to at least those required under the level contribution method. This method expresses employer contributions as a constant percentage of future payrolls that, together with future employee contributions and investment earnings, will finance the benefits for a typical new entrant to the plan and, in addition, will maintain the unfunded liability as a constant percentage of future payrolls.

## 7. COMPARATIVE FIGURES

Certain 1985 figures have been reclassified in order to conform with the financial statement presentation adopted in 1986.
